THE MEAT FAMILY

MITSOPOULOS

THE MEAT FAMILY

OUR HISTORY

Mitsopoulos The Meat Family has been active in the meat industry for 60 years in the Peloponnese, specifically in the Corinthia region.

The Peloponnese, with its fertile land and diverse climate, is known for producing high-quality meat. The region's rich vegetation provides excellent conditions for animal farming, ensuring both great taste and nutritional value in our products.

In the Peloponnese, pig and cattle farming has a long-standing tradition, with techniques passed down from generation to generation. The second generation of Mitsopoulos Farm continues this legacy, producing meat distinguished by its tender texture, rich flavor, high quality, and authentic taste.

As true producers from the Peloponnese, we combine traditional methods with modern techniques, ensuring that the meat reaching your table is pure and delicious.

Our commitment to quality, along with respect for the environment and animals, are core values that define us.

The rich culinary tradition of the Peloponnese allows us to utilize our meat in a variety of recipes, from traditional to modern creations, offering unique flavors that satisfy every palate.

Today, our company is a thriving Greek enterprise with a strong market presence and one of the most modern, vertically integrated meat production and processing units in Greece.

OUR PHILOSOPHY

Our vision is to create a world where taste, innovation, and sustainability go hand in hand to improve the quality of life for everyone. We strive to offer top-quality meat that honors tradition while supporting sustainable development.

Our goal is to be pioneers in the meat industry, providing products that not only meet our customers' needs but also adhere to the highest standards of taste, safety, and ethical farming.

We integrate the latest technologies and practices into our production process.

Our commitment to sustainability includes reducing our environmental footprint and supporting local communities, contributing to the growth of the local economy.

We believe in transparency and responsibility at every step of our production chain.

From Corinth to your plate, we ensure that every piece of meat we produce is healthy, nutritious, and delicious, always respecting animals and the environment.

Our aim is to set a benchmark in the industry by promoting values of quality, ethical farming, and environmental awareness, incorporating circular economy principles into all our activities.

Join us in shaping the **success story** of your business.

Innovation, Flexibility, and Exceptional Quality

Different types of meat, such as pork, beef, chicken, and lamb, in various cuts and special recipes, meet the needs of the modern professional.

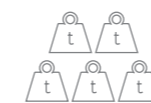

- Excellent raw materials and consistent quality
- Remarkable flavor characteristics
- High product yield
- Comprehensive quality control framework

The high “**product yield**” is a significant benefit and profit advantage for professionals.

At Mitsopoulos Farm, we pride ourselves on our commitment to excellence and quality assurance in our industry. Our dedication to meeting and exceeding meat industry standards is reflected in the certifications we have obtained.

- FSSC 22000 V5.1 2023 (Food Safety Management Systems)
- ISO 22000:2018
- Halal Certification
